

# tatianavoegerl.portfolio.com

This professional portfolio will allow job recruiters, software developers, and other industry professionals to learn about my experience and skills.

My professional portfolio will showcase the numerous different projects I have worked on and all my experience both in industry and at school. The website will include additional details beyond what can be found on my resume. In addition, the professional portfolio will include some commonly asked interview questions and my responses to them. Lastly, the website will highlight some personal and professional projects and include a contact page for potential employers to reach out with ease. The primary goal of this website is to allow potential employers to learn more about me in more detail than would be possible through a resume.

## PERSONAS

### Industry Recruiter

Recruiter trying to find potential new hires that are a good match for their company.

### Hiring Manager

Hiring Manager trying to learn more about me before making a hiring decision.
